## PROJECTS

### Personal- Portfolio

- Developed a responsive web application of PersonalPortfolio using, Java, HTML, CSS and JavaScript, featuring dynamic UI components and integrated with Google sheets in backend. Implemented interactive dashboards using Power BI to visualize key metrics.

### Food-Delivery-App

- Built a responsive food delivery app with React and Tailwind CSS featuring category filters, search, and cart functionality. Used Context API for state management and designed a clean, mobile-friendly UI with reusable components. Integrated dynamic product rendering with real-time cart updates for a seamless user experience. Implemented optimized image loading and responsive layouts to enhance performance and accessibility.

### Travel Companion App

- Developed a React-based location app to display nearby places using Google Maps API and RapidAPI, featuring category filters, interactive map markers with info popups, and responsive design. Implemented geolocation for personalized recommendations and optimized API calls for performance.

## INTERNSHIPS

- During my cloud computing internship, I developed project involving CI/CD pipelines using tools like Git, Jenkins, and Docker. I automated deployment processes and optimized workflows, gaining practical experience in DevOps practices within a cloud-based environment.
